and the usual symptoms are those of acute catarrh, but the old-time catarrh powders. salves and sprays do not cure it; neither does the application of antiseptics through an inhaler give anything more than relie for a short time.

The antiseptics are all right: they will kill the germs of catarrh and grip if they are applied rightly, but their local application to the nose and throat avails little, because the germs are in the blood and through the whole system.

Stuart's Catarrh Tablets contain man} these same antiseptics that are used in sprays and inhalers, but instead of applying hem to the inflamed membranes of the nose and throat they are taken in to the stomach and thus reach the blood, the real seat of the disease, and drive out the infectious germs through the natural channels of the owels and kidneys.

In other words, Stuart's Catarrh Tableta reach the cause of the mischief, instead of merely local symptoms. The remarkable success of these tablets in curing grip, catarrh and throat and lung

troubles is because they drive the catarrhal poison from the system, and the nose and throat become clear of the excessive secretion of mucus, which causes the hawking spitting and gagging, because the secretion s not supplied from healthy blood. Two years ago Stuart's Catarrh Tablets.
